Show how you could use the **Make a Ten** strategy to solve the following problems:

1. On her drive through Nova Scotia, Mrs. Gregoire noticed nine houses that had Acadian flags. She saw another 4 houses that had Canadian flags. How many houses did she see that had a flag in total?
2. In the scooter game we're playing in the gym, the red team scored 8 points. The blue team scored 7. How many points did the two teams have altogether?
3. On a beach near Halifax, Nelson went looking for seashells. He found nine and his little brother found 6. How many seashells did the boys find altogether?
